Education

University of St Andrews — *Scotland*

BSc Mathematics & Economics (Predicted 1st) — *Sep. 2024 – Jun. 2028*

- Relevant coursework: Linear Algebra, Multivariate Calculus, Probability & Statistics, Microeconomic Theory, Macroeconomics.
- Year abroad 2026/27: Bocconi University, Milan (Semester 1) and University of Hong Kong (Semester 2).

Imperial College London (via Coursera)

Mathematics for Machine Learning Specialization — *May 2026*

- 3-course specialisation: Linear Algebra (vectors, matrices, eigendecomposition, PageRank), Multivariate Calculus (gradients, optimisation, backpropagation), and PCA (dataset statistics, dimensionality reduction on MNIST).

Experience

ENODA — *Edinburgh*

Economics Analyst — *Jul. 2024 – Present*

- Cut day-ahead electricity price forecast error by **25% (RMSE)** versus an autoregressive benchmark using an ML model on Polish wholesale market data.
- Vectorised a legacy R backtester and removed redundant I/O, cutting computation time by **98%** (50s to $<$1s).
- Promoted twice in two years (intern to analyst) and converted to full-time; built a generalisable modelling framework adopted across **4 European markets**.

Bloomberg Decoded; McKinsey Tech & AI; Schroders Spring Insight — *London*

Spring Insight Programmes — *Spring 2026*

- Won 1st place in the Bloomberg Decoded EDA and Puzzle Challenges and the McKinsey Tech & AI case competition, across three selective spring programmes.

Elphinstone Capital Management — *St Andrews*

Founder & Head of Quantitative Research — *Jun. 2025 – Jun. 2026*

- Founded a UK-wide ML and quantitative trading student association; onboarded **20+ students** across **9 universities** onto a containerised research platform that cut setup from days to hours.
- Led a **3-person team** to **top 11 / 1,000+** in the HKU x Avenir algorithmic trading competition with a cointegration-based strategy; ran it live with **full P&L on $10K+ AUM** at $<$**5% drawdown**.
- Won **Highest Trade Volume** at Imperial Algothon 2026 (IMC-sponsored) with a market-making bot using inventory-skewed quotes (Avellaneda-Stoikov-inspired) and time-decaying edge thresholds.

Mercury Capital Management — *St Andrews*

Team Head — *Sep. 2024 – Oct. 2025*

- Ranked **1st across all cohorts** in the internal algorithm competition, delivering the highest risk-adjusted returns in fund history with a rank-based arbitrage CNN and a custom loss function.
- Guided a **4-person team** to a **top 5%** finish in **IMC Prosperity 3** (**10,000+ participants**) with a market-making strategy using dynamic spread adjustment.
- Taught **3 lectures** on model validation and risk management to **15 students**.

Castlecliffe Consultancy — *St Andrews*

Team Lead — *Jan. 2025 – May 2025*

- Built econometric models behind fixed-income portfolio positioning for a US regional bank's desk; the client adopted **3 of 4** recommendations, informing **$50M+** in capital allocation.

Projects

crypto-backtester-binance – Open-Source Backtesting Library — *Python, pytest, CI/CD, published on PyPI*

Founder & Maintainer

- Published an **open-source** quant backtesting library to PyPI with full CI/CD pipeline; supports both Binance spot and perpetual futures with cached historical OHLCV, trades, funding rates, and open interest.
- Built an order management system simulating positions, balances, and trade history; pluggable position managers handle risk sizing, and permutation testing validates statistical significance of returns (Sharpe ratio, drawdown, PnL).

Interests & Activities

Sports Tennis, Squash (Competitive), Muay Thai, Golf

Hobby Poetry, Psychology of Connection, Linguistics, Theory of Communications
