Education

University of St Andrews — *Scotland*

BSc Mathematics & Economics (Predicted 1st) — *Sep. 2024 – Jun. 2028*

- Relevant coursework: Linear Algebra, Multivariate Calculus, Probability & Statistics, Microeconomic Theory, Macroeconomics.
- Year abroad 2026/27: Bocconi University, Milan (Semester 1) and University of Hong Kong (Semester 2).

Imperial College London (via Coursera)

Mathematics for Machine Learning Specialization — *May 2026*

- 3-course specialisation: Linear Algebra (vectors, matrices, eigendecomposition, PageRank), Multivariate Calculus (gradients, optimisation, backpropagation), and PCA (dataset statistics, dimensionality reduction on MNIST).

Experience

ENODA — *Edinburgh*

Economics Analyst — *Jul. 2024 – Present*

- Promoted twice in two years (Intern → Assistant → Analyst); converted to full-time.
- Built generalisable TAM model for ENODA's transformer product line, quantifying addressable revenue across **4 priority European markets**; presented to CEO and informing the company's Series B investor narrative.
- Cut day-ahead energy price forecast error by **25% (RMSE)** versus an autoregressive benchmark in Polish wholesale electricity market.
- Reduced in-houe backtester computation time by **98%** (50s to <1s) by vectorising legacy R codebase and eliminating redundant I/O.
- Deployed and maintained real-time execution of forecasting models on GCP.

Elphinstone Capital Management — *St Andrews*

Founder & Head of Quantitative Research — *Jun. 2025 – Jun. 2026*

- Founded a UK-wide ML and trading focused student association, onboarding **20+ students** from scratch and building a self-sustaining learning community.
- Architected containerised research platform adopted by **20 students** across **9 universities**; standardised workflows cut onboarding from days to hours.
- Led **3-person team** to **top 11 / 1,000+** in HKU x Avenir algorithmic trading competition with a cointegration-based strategy; ran live with **full P&L responsibility on $10K+ AUM** and **<5% drawdown**.
- Won **Highest Trade Volume** award at Imperial Algothon 2026 (IMC-sponsored 24h hackathon) with a priority-queue scalping and market-making bot featuring inventory-skewed quotes (Avellaneda-Stoikov-inspired) and time-decaying edge thresholds.

Bloomberg Decoded; McKinsey Tech & AI; Schroders Spring Insight — *London*

Spring Insight Programmes — *Spring 2026*

- 1st place, Bloomberg Decoded EDA Challenge and Puzzle Challenge; 1st place, McKinsey Tech & AI case competition.

Mercury Capital Management — *St Andrews*

Team Head — *Sep. 2024 – Oct. 2025*

- Ranked **1st across all cohorts** in internal algorithm competition; delivered highest risk-adjusted returns in fund history with a rank-based arbitrage CNN using a custom loss function.
- Led **4-person team** to **top 5%** finish in **IMC Prosperity 3** (**10,000+ participants**) via market-making strategy with dynamic spread adjustment.
- Delivered **3 lectures** on model validation principles and risk management to **15 students**.

Projects

crypto-backtester-binance – Open-Source Backtesting Library — *Python, pytest, CI/CD, published on PyPI*

Founder & Maintainer

- Published an **open-source** quant backtesting library to PyPI with full CI/CD pipeline; supports both Binance spot and perpetual futures with cached historical OHLCV, trades, funding rates, and open interest.
- Built an order management system simulating positions, balances, and trade history; pluggable position managers handle risk sizing, and permutation testing validates statistical significance of returns (Sharpe ratio, drawdown, PnL).

Certifications

J.P. Morgan via Forage

Quantitative Research Job Simulation — *Jun. 2026*

- Virtual experience covering natural gas commodity pricing, credit risk modelling in Python, and FICO score bucketing for a quant trading desk. Credential ID: LsyyNwoHaMNt4dkPz.

Interests & Activities

Sports Tennis, Squash (Competitive), Muay Thai, Golf

Hobby Poetry, Psychology of Connection, Linguistics, Theory of Communications
