Education

University of St Andrews — *Scotland*

BSc Mathematics and Economics (Predicted 1st) — *Sep. 2024 – Jun. 2028*

- Relevant: Probability & Statistics, Linear Algebra, Econometrics, Microeconomic Theory

Experience

ENODA — *Edinburgh*

Economics Analyst — *Jul. 2024 – Present*

- Promoted twice in two years (Intern → Assistant → Analyst); converted to full-time.
- Shipped ML forecasting pipelines (Python/R) now used in daily dispatch decisions for energy clients; improved day-ahead price prediction accuracy by **12%**.
- Shipped automated ETL pipelines processing **2+ years** of hourly market data; eliminated **10+ hours/week** of manual work and cut report latency by **98%** (50s to <1s).

Elphinstone Capital Management — *St Andrews*

Head of Quantitative Research — *Jun. 2025 – Present*

- Architected containerised platform now used by **15+ developers across 5 universities**; standardised workflows cut onboarding from days to hours.
- Built real-time trading system in Python deployed on Binance handling **$10K+** in live trades; ran on-call for the 24/7 production system.

Mercury Capital Management — *St Andrews*

Team Head — *Sep. 2024 – Oct. 2025*

- Built CNN in TensorFlow/Keras with custom loss function; placed **1st across all years** in fund-wide algorithm competition.

Projects & Founded Work

Project Assistant – AI Productivity Platform — *Python, FastAPI, React, ChromaDB, Docker*

Creator

- Wrote spec and shipped a RAG-powered interface unifying **6+ productivity platforms** (Microsoft 365, GitHub, Telegram, OneNote); removed context-switching for end users.
- Architected an **AI action-approval workflow** gating every automated change, designed around real user-trust constraints rather than raw capability.

Stirlingshire Charts – Real-Time Financial Charting App — *Python, Flask, Socket.IO, JavaScript*

Co-Developer

- Designed real-time data path streaming **1-second OHLCV bars** via WebSocket to TradingView frontend; scales to **5,000+ symbols** for live trading decisions.
- Hardened production reliability with **86 unit tests** covering live aggregation, timezone, and WebSocket edge cases that real users would have hit.

Project Paradise – Quantitative Education Community — *Python, pytest, CI/CD, published on PyPI*

Founder

- Founded community from scratch, onboarded **20+ students**, wrote curriculum end-to-end; published companion open-source backtesting library to PyPI with full CI/CD.

Skills

Languages	Python, JavaScript/TypeScript, SQL, R
ML/Data	PyTorch, TensorFlow/Keras, Pandas, NumPy, scikit-learn
Backend	FastAPI, Flask, REST APIs, Socket.IO, Docker, Git
Spoken	English, Russian, Ukrainian (native); German (conversational); Hebrew (beginner)

Honors

2024 **1st Place (all years),** Mercury Capital Trading Algorithm Competition

2025 **Top 11 / 1,000+,** HKU x Avenir WEB3 Trading Competition

2025 **Top 5%,** IMC Global Trading Competition

Interests & Activities

Sports	Tennis, Squash (competitive), Muay Thai, Golf
Academic	Philosophy, Linguistics, Theory of Communications
